LOCAL MINING REVIEW.

For the Week ending Jan. 4th, 1873.

Our review this week comprises many mines, and is fuller than any previous review for some weeks. The mining interest is increasing generally in this Distriet, and all engaged in that business are more than hopeful of vast developments and rich returns during the year upon which we have just entered. Let ters from capitalists making inquiries about the future prospects and present aspect of our mines are frequently received here. Three incorporations of companies in this District are referred to last 10 feet the ore is of a free milling character. Heretafore the ore was somein another column. The shipments of what base. There is about \$25,000 in the treasury at present. Hoisting works will be put up as soon as the depth of bullion for the week show an increase over previous shipments, \$98,905.40.

La Paz.-This mine now has a complete title, having purchased the control-ing interest in the Prairie Queen. The depth of the mine is over 100 feet at present, and a contract has been let for 200 feet and also to timber the entire distance. The La Paz possesses one of the oldest titles over the Divide; the manner in which it was located, the purchase of the Prairie Queen, etc., gives it a title that cannot be shaken. It is intended to make this mine one of the first in the District by thoroughly developing it. The ledge is regular, and at the proper depth it is generally conceded that the yield of rich rock will be unvarying and in immense quantities. The people of Pioche are just beginning to appreciate the intrinsic value of the La Paz. Many of them have been dabbling in the stocks of Washoe, much of which is not only fletitions, but a downwicht wind. fictitious, but a downright swindle. They are now emerging from the dilemma in which they have placed themselves, and investing in the stocks of Ely District. An attempt to name the many good mines in the D.strict would be impossible in the limits of a newspaper article. The La Paz, we feel confident, stands in a position to become one of the first in the District. It has been incorporated in San Francisco by leading men and the stock holds such prestige that in all probability laws for the prestige that in all probability laws for the proba ability large figures will be offered before

CHARTER OAK. - This mine, well known to all in the district, has gained considerable reputation from the rich ores and well-defined vein that has been presented within the last six weeks. It is claimed that the Charter Oak has the oldest location of any of the mines in its vicinity. There was one or two mines located prior to the Charter Oak, but for some reason they made relocations after this claim had done considerable work. The owners did wisely by incorporating, thus connecting themselves with first class men in San Francisco. The working capital being advanced regularly, they are keeping the work ahead-sinking the shaft to the depth of 100 feet, running a drift from that point, and now sinking a winze on the ledge. Fine ores are being taken out every day. 12 tons are now on the dump, assaying in the thousands. Mr J. B. Low, the Superintendent, will probably arrive shortly, when more work and further developments will no doubt be made.

MAZEPPA. - The old works of this mine have a shaft 140 feet in depth, and the working shaft is situated 100 feet west from the old works. Ore shown in this shaft is of a very high grade. A drift is now being run to cross the ledge east, and the progess has been so great that the drift is now under the old works. The ore in the southerly portion of the mine shows 20 inches in width. This week taking out cre from the original shaft will be commenced and endeavors made to connect with the drift. Ore taken from this shaft some time ago Gents farnishing goods at Jas. Fin.

d8-1m

yson's.

d8-1m

For the Holldays.—P. Heitzelman, in the chances for a tiptop mine are decidedly good; 12 men are working night and day.

GREY EAGLE AND SETTING SUN CONSOL-IDATED. - This corporation is using every effort to make a success with this consolidation. Working constantly, and have attained a depth of 125 feet. The work has all been concentrated on the Grey Eagle. Some 20 odd tons of ore lie on the dump, which assays from \$200 to \$390 per ton. The Setting Sun has a shaft sunk 75 feet, and looks well. A house has been placed over the Grey Eagle shaft, and everything is comforta-ble. Mr. Dominick Tarpey will probably be made Superintendent. He is a young man of excellent character, and has a perfect knowledge of mining affairs, and is well worthy of the position.

DOLLY VARDEN.-Seven months ago (June 3) we gave a full description of this mine, together with the exact situation, and stated that a Mr. Uhlmann had gone to New York to influence capital towards working the mine, and bringing Eastern money to this market. That gentleman, as we understand by late advices, has been unsuccessful, and it is generally conceded that he will come back to Pioche, and, in conjunction with parties here, sink on the mine to a good It is now 65 feet deep, has two well defined walls and streaks of mineral showing from the surface down. It can be considered a first-class prospect.

Suffolk. — This mine is situated between the Alps and the Bowery mine; it has not been worked for some time. and has only the depth of 20 feet sunk on the ledge. It was located some two years ago, and fine ore was struck. Several parties from San Francisco have viewed the mine; and expressed them selves well satisfied with the prospect. It has been bonded in San Francisco and as soon as proper arrangements are made the mine will be worked. A Mr. Wolfson, from the bay was here a short time ago and took a good look at the vein, etc., and reported favorably.

LEE MINE. - This mine is in Highland District, and was recently bonded to a San Francisco company for \$20,000. This was something of a sacrifice, but as the owners of this mine, Meagher & McGregor, wished to induce capital into the district-baving other mining property which they will thus be enabled to develop—they made the temporary sac-rifice, feeling assured that hereafter

they will find it to their advantage. Procue.-Still drifting from the bot tom of the shaft. As yet have not struck the ledge, but it is expected to present To the ladies of Pioche: If you will self every day. Four tons of ore are being hoisted daily from other portions of the mine, which bears the best appearance and produces rich results. Sixty-one men are kept constantly at Muffs and furs in great variety, for work. The Magnet Mill is kept steadily at work on the ores of this mine.

ruary, 1870, contains 1,000 feet, running east and west. The requisite amount of work was done on the mine, and it presented such a favorable appearance that it was incorporated in San Francisco last October with Gashwiler as President and Messrs. Raymond, Moulder and Light-ner as Trustees. Mr. John Nagle is Superintendent, and since his appoint-ment work has been vigerously pushed: 60 tens of first class is now on the dump; some of the same class was milled and pulped \$200 to the ton. The shaft is 100 feet in depth. A winze from this level has reached a depth of 45 feet. The ledge shows well, being of a rich decomposed yellow chloride. The ledge in the minze is 2 to 3½ feet in width. For the last 10 feet the feet in width.

PORTLAND. - This mine, located in Feb.

the mine requires. Thirty men are em-ployed divided into 8-hour shifts. Excension.—The winze in the eastern portion of the mine is now 175 feet deep. The other winze spoken of in our former review is 100 feet distant from that above mentioned. Drifting is now being done to connect the winzes. The ore shows in the drift as far as worked, and is very rich. The main or new working The main or new working shaft formerly known as Ocean Bell is 175 feet deep. Timbering of this shaft has been the principal work for some time. It is now finished, and the work of sink-ing will be resumed. At the depth of 300 feet it is expected the vein will be crossed. On the Excelsion dump 275 crossed. On the Excelsior dum tons of rich ore awaits crushing. mill is kept steadily running and the pulp value of the ores keeps going to better figures. Thirty-five menare working day and night and the quantity and quality of the ore hoisted is truly amaz-

Meadow Valley,—No. 3 of this mine has a depth of 620 feet at the 7th level. Sinking at this point and taking out ore. Sinking at this point and taking out ore.

No. 5, or Summit Shaft, is 430 feet deep
and sinking continuously. No. 7 is 750
feet deep and still sinking. The bulk of
the ore comes from No. 3 and some from No. 7. An average of 130 men is kept at work constantly and the mine steadily improves. On the different mines of this company drifting east and west is actively carried on. The Meadow Val-ley, the first mine of this District, has never failed to produce its regular quota of silver, and still stands steadfast. company at one time kept the entire town of Pioche alive, and its present working and character of the rock being milled will make it equal to the Comstock lode eventually.

RAYMOND & ELY.—Depth of the Light-ner shaft to the 7th level, 623 feet vertical depth. The 7th level is just being opened, and the ore shows splendidly. The ore between the 4th and 5th and the 5th and 6th levels looks equally as well. Twelve hundred tons of 3d class ore lies on the dump and about 1000 tons of good ore at the mill; 90 tons are being hauled daily to the mill. \$11,000 is be ing turned out every day, and two cages are used for hoisting ore night and day. There are about 200 men at work in the mine, and from developments being made in different portions of it, no doubt rich ores will soon be unearthed in quantities to surprise the world.

Bowers. - Superintendent Blair is endeavoring to work this mine in the most economical manner. The contract let some time ago is about finished. and the depth has reached 325 feet. Drifting will be commenced from that point to the ledge. The Superintendent proposes to work the mine hereafter himself and in such a manner that no expense will be incurred except that which is actually necessary. Mr. Blair has been very sick for the last two weeks. but we are pleased to state that he is now up and doing well, and can be seen daily rushing to and fro attending to business.

SUNBEAM .- The work on this mine has been temporarily suspended. The work that has been done is well worthy of mention. At the lower level, 220 feet from the surface, there are two winzes that have been in active operation. They are 75 feet apart; one had just been started and the other reached a depth of 70 feet. The finest ore in the mine came from this point. The Magnet Mill has been running on the ores and some 30 tons now lie on the dump. Twenty-five men had been kept constantly at work. The prospects were flattering. Work will probably be resumed shortly.

Parian Mine.—The Parian, which we mentioned some time ogo, has been in-corporated in San Fsancisco, and work is being rapidly pushed ahead by the Superintendent, R. S. Wright. Fifteen feet has been sunk on the vein and at that depth the ledge opens up 2 feet in width. The quartz has an appearance similar to that of No. 3 when at the depth of 50 feet. A contract has been let to sink 100 feet.

TODLER MINE.—On Monday last a small streak of rich ore was struck in this mine, and from its appearance it will no doubt open up large in a few feet further. The depth is now 100 feet, and two shifts of men are kept constantly at work. Our next review may be able to give a description of the ores from the

LEGISLATIVE CLAIM.—This mine is situated in a westerly direction from the Proche Phenix hoisting works. Some of our leading citizens are interested. No work has been done lately, but the prespect looks so well that it is the intention of all the parties to resume operations in

PACIFIC TUNNEL.—It presents a favorable appearance throughout, but, pursuant to orders from San Francisco, work has been temporarily suspended. The suspension, however, will last but a short time, and its speedy development will follow the resumption of work.

SILVER PEAK, Running drift west from the bottom of the incline. Taking out a little ore all the time. From assays it proves to be first-class. Other portions of the mine bear a promising ap-pearance. Four men are at work con-

POBTLAND EAST, -This mine has been lying idle for some three weeks past. Work will be resumed in a few days. 91 feet of shaft has been sunk. The vein matter shows well. The chances are good, and all that is needed is depth to make it a good mine.

OLIENT,-This mine has now started up in carnest, under the administration of Mr. J. C. Lennan. A contract for 100 feet has been let, and the parties are working vigorously to attain the depth. | currency.

GREY AND BESHOP .- The depth of this mine is about 250 feet. The vein has been in sight the entire depth, and spots of ore of a very rich character can be seen throughout. The present appear-ances are such that it is expected an immense body of ore will open up within the present week.

WASHINGTON CEEOLE.—The incline has attained a depth of 600 feet; 22 men are employed steadily. The prospects look flattering. Everything is being worked in a miner-like manner, and there is a probability that rich ores will present themselves before many more feet have been sunk.

RAILBOAD MINE.—This mine is now working three men, and driving their shaft to a good depth every day. The prospects are promising, and the owners are confident they will be able to cry are confident they will be all. "Eureka" before a great while.

INCORPORATED .-- On the 30th ult. the following sertificates of incorporation, among others, were filed in San Francisco: The Wide West Mining Company, formed for the purpose of mining in the Ely Mining District, Lincoln county, Nevada. Capital stock, \$3,000,000; divided in shares of \$100 each. Trustees: T. N. Williams, S. W. Williams, J. M. Case, S. A. Raymond and J. A. Albertson...... Aladdin Gold and Silver Mining Co.—Lecation, Ely District, Nev. Capital stock, \$3,000,000. Trustees—Henry Dutton, Robt. Sherwood, Benj. Dore, E. L. Peckham and F. Westhouse Crescent Mining Co.—Location, Ely District, Nev. Capital stock, \$2,500,000. Trustees—M. A. Sharp, A. L. Muller, G. W. Allen, George Thompson and Wm. Paulding.

TO THE MINRES OF ELY DISTRICT .-Many of you are not aware that there is a Miners' Union here, of which you are invited to become members. We wish the miners and the public to understand that this movement is merely to maintain the rights of miners, to the dead of our membership. We seek to end not in full accord with the law succor each other in sickness and to bury and good order. We point with pride to the Union at Virginia and Gold Hill, and seek to emulate its example. sire to correct the rumor that this movement is in a particular interest: all miners are cordially invited to unite with us, as our organization is designed to benefit all miners of Ely District, and through them the whole community.

New Officers,-Most of the county officers elected in November have filed their bonds, and all will enter upon the discharge of their duties to-morrow. In Tuesday's issue we purpose giving a full list of these officers, with the amount of the bonds of each and their sureties. The new county officers are: P. B. Miller, County Clerk; W. S. Travis, Sheriff; Geo. Goldthwaite, District Attorney John Roeder, Treasurer; K. J. Hanley Assessor; E. Schoppman, Surveyor, Dr. D. L. Deal, Public Administrator and Coroner; Louis Sultan, Superintendent of Schools; D. A. Fulks, T. J. Jones and C. R. Carden, County Commission-

FAILED TO COONECT. - Yesterday a party of the friends of George Birdsell, who was on his way from Hamilton, concluded that it would be a pleasant surprise to that gentleman to meet him at the 4-mile wells and bring him into town by private conveyance. His friends, therefore, obtained one of Barnes' Kimball vehicles, with two mules and two jacks att ched, and started for the 4-mile wells, but they unfortunately took the Highland road, and so failed to meet Bridsell. However, he reached Pioche in safety, and we are truly glad to meet him and renew assurances, etc.

Auction .- To-morrow Geo. A. Davis will commence the sale by auction of the dry and fancy goods of J. Cohn Bro., who are about retiring from that business. Fancy goods, dry goods, shoes and many articles which we cannot find room to enumerate, are among the articles to be offered. Sale to take place at L. D. Strong's paint shop, Meadow Valley street, opposite the old theatre.

FINE BULLION. - Mr. T. R. Butler, assayer and refiner, melted some 4,000 ounces of crude bullion belonging to the Chapman mine, which ranged in fineness from 870 to 878. Such products give true evidence that the Chapman will loom up before long, and that the stock will be in demand at good prices.

MR. JOHN MAGUIRE will be the recepient of a benefit at the Theatre on Wednesday evening, which will be the wednesday evening, which will be the only dramatic performance until the arrival of the stars. A very attractive bill will be presented, and we hope the benefit may be substantial as well as complimentary.

MR. AND MRS. BATES .- Owing to the illness of Mr. Bates, of which fact Mr. Calhoun received telegraphic advices last evening, the appearance of these stars is necessarily deferred for a few days. Of their appearance due notice will be given.

THE RAPPLE for a house, lot and furniture, on Cedar street, will positively take place on Tuesday evening, at the Palace Club Rooms, (Russ. Scott's.) Tickets for sale by the present owner of the property, Jesse Beene.

SIDEWALES .- We are glad to see some attention is being paid to the sidewalks on Lacour Street, just beyond the Post-office. We would like to see a good sidewalk extended to the Court House .

OYSTER SALOON .- Mr. Scully is fitting up a handsome oyster saloon and chop house in the San Jose Hotel, a few doors below our office. It will be opened on Tuesday. To ARRIVE To-DAY .- The following

passengers left Hamilton yesterday, who will arrive on to-day's stage: Lane and John Booth. Among the arrivals last evening by the

Hamilton stage will be noticed the name of Judge James H. Hardy. The aggregate assessed value of taxable property in the United States in 1870 was \$14,178,986,732—the actual value, \$30,068,518,507. The amounts are in Miscellaneous.
